

BORE | 1-3/16"

STROKE | 4"

BPM | 1500

LENGTH | 17-15/16"

WEIGHT | 18.5 lbs

Michigan Pneumatic Tool is proud to introduce the most powerful, universal chipping hammer ever designed! Engineered specifically to comply with various regulations for bridge work and other demolition work in both Canada and the USA (example: OPSS>PROV 928 Standards for Concrete Removal – Rehabilitation), the MP-MOTOC-375 combines the best features for performance while maintaining strict tolerances and specifications to insure compliance. The resulting tool is powerful and fast, insuring faster material removal across a wide variety of jobs than the traditional chipping hammer designs. Lightweight, powerful and fast – Try the MP-MOTOC-375 to safely shorten your work time and speed up your material removal rate.
